MARKETING & PROMOTIOS

PROH2O is actively engaged in building brand presence through strategic partnerships and dynamic campaigns across multiple channels. Our approach is designed to maximize visibility and consumer interaction.

- **Partnerships:** We work closely with sports clubs, sporting events, retailers, and forecourts to integrate our product into relevant environments and reach target audiences.
- **Activations & Campaigns:** PROH2O regularly conducts activations and runs online social media campaigns to generate buzz and encourage consumer participation.
- **F1 Car Replica:** To create significant brand awareness, we feature a life-sized 1:1 replica of a Formula 1 car. This replica is placed in high-traffic areas such as malls and outside forecourts, capturing attention and encouraging passersby to engage.
- **Social Media Engagement:** The F1 replica draws consumers to take photos and share them on social media, amplifying brand visibility through organic, user-generated content.
- **This multifaceted approach** allows us to drive awareness while engaging with both consumers and key retail partners.

MADE IN OUR OWN STATE OF THE ART & ENERGY INDEPENDENT FACTORY

Unitedh's state-of-the-art beverage manufacturing plant is a model of modern engineering and sustainable innovation. Nestled in a region known for its forward-thinking approach to production, this facility represents the future of beverage manufacturing. Designed with cutting-edge automation and equipped with the latest technology, the plant operates at peak efficiency, ensuring precision and consistency in every product made.

At the heart of Unitedh's plant is its strict adherence to FSSC22000 standards, the highest food safety and quality certification globally. This commitment to excellence means that every step of the production process is meticulously monitored, ensuring the beverages meet and exceed international safety and hygiene standards. Every bottle that leaves the facility is a testament to Unitedh's dedication to quality and consumer trust.

But what truly sets this plant apart is its commitment to sustainability. In a bold move to reduce environmental impact, Unitedh has made the facility entirely solar-powered. With a vast array of solar panels providing all the energy required for production, the plant operates off the grid, proving that high-volume manufacturing can be both efficient and eco-friendly.

From automated mixing and packaging lines to rigorous quality control systems, Unitedh's plant is a seamless blend of technology, sustainability, and uncompromising quality, setting a new benchmark for beverage production on the African continent.
